

A passionate and helpful Community - waiting to be explored

Google collaborates with university students who are passionate about growing developer communities and support them with starting student clubs on their campuses.

What is a DSC?

A Developer Students Club is a Google recognized student body at a college which directly reports to Google for their activities and is supported by the tech giant.

A DSC conducts workshops, seminars and other fun activities which help the students connect with Google.

And we give Google interview referrals too!

We help learn to code, and grow as a developer!

We teach you how to use different Google technologies to create your next big project!

We provide high quality, hands-on training for everyone ranging from noob to pro!

Upcoming Events

We have events throughout the year, ensuring we build a community that can help you create awesome projects and have fun coding!

Beginner's Workshop

This modal window will allow you to add more information regarding the upcoming event. The idea is to have the initial summary on hover, and by clicking on the card itself, potential community-members can view the details and a more in-depth description of the event on offer.

For past events you could add in photographs of the event and have a gallery here allowing potential community members to see what the events are like.

An agenda can help potential visitors of the event know, what the event is about:

- 14:00 - Greeting by Chair of DSC at Daviet
- 14:30 - Python Syntax
- 15:00 - Variables and Data Types
- 16:00 - Lists, Dictionaries and Tuples

If there is any special information such as:

- Venue information, if it is to be held in person
- Any sort of equipment needed such as laptops or headphones

Can be placed in an ordered list like that.
